

**International Conference on Applications of
Optimization Techniques in Engineering - 2012**

ICAOTE-2012

Special session on:

"APPLICATIONS OF OPTIMIZATION TECHNIQUES"

Session Chair

Dr.M.SARAVANAN

Principal

SBM College of Engineering and Technology,

Email:drmsaravanan@yahoo.com

The scope of this special session is to encourage the application of optimization methods in the wide ranging area of engineering sciences and to ease the development of advanced optimization technique for undeviating or not direct use in engineering sciences. Our intention is also to bridge the gap between the theoretical problems and application determined optimization societies of the engineering field.

Subject Coverage

Topics include, but are not limited to, the following:

Linear programming

Dynamic programming.

Optimization techniques

in the areas of application covered are aerospace

Chemical

Civil

Computer

Electrical and Mechanical Engineering.
